

THE DOCKSIDE RETREAT

Opening Fall 2016

The moment that you enter the drive of the Dockside Retreat, its casual presence welcomes you to relax and enjoy one of the South's best lake-front resort communities. The timeless durability of natural stone and stucco embrace the architecture and create a natural warmth and security that is surpassed only by the piece of mind created by knowing that this high-performance home was built to last by one of the Cliff's preferred builders. The floor plan is a medley of indoor and outdoor entertaining areas that frame and highlight the water-front view from many of the living spaces including a rec room, screened porch and wet lake entry. The interior was space-planned to be lived in without compromising function or flexibility for a private and active lifestyle.
